- 3.2 Gallon Tank in Plastic or Steel
- Large Selection of Designer Faucets
- Built in TDS Monitor
- Economical
- Environmentally Friendly
- Delicious!

15"W(381mm) x 4.5"D(114mm) x 16"H(406mm)

Certified to NSF/ANSI 58 for the reduction of:
Cadmium, Chromium III, Chromium VI, Lead, Selenium and Arsenic

This system has been tested for the treatment of water containing pentavalent arsenic (also known as As(V), As(+5), or arsenate) at concentrations of 0.050 mg/L or less. This system reduces pentavalent arsenic, but may not remove other forms of arsenic. This system is to be used on water supplies containing a detectable free chlorine residual or on water supplies that have been demonstrated to contain only pentavalent arsenic. Treatment with chloramines (combined chlorine) is not sufficient to ensure complete conversion of trivalent arsenic to pentavalent arsenic. Please see the Arsenic Facts section of the Performance Data Sheet for further information.
